

## TECHNICAL CHARACTERISTICS

Version	HP: High production machine with motors inside the driving headstock.	EP: Flexible machine for small lots of yarns with motors on board the machine.	MODULAR: Modular machine made of independent sections (from 1 to 6) for the production of different yarns at the same time. Motors on board every single section.
Gauge	150 mm	150 mm	150 mm
Ring diameter	115 mm	115 mm	115 mm
No. of spindles	from 8 to 168	24	8 per section
Flanged bobbin height	220 mm	220 mm	220 mm
Bobbin height	450 mm	450 mm	450 mm
Max. length	2600 mm + No. of spindles x gauge	5350 mm	1250 mm + 1700 x No. of sections
Max. width	2500 mm	2500 mm	2500 mm
Max. height	2500 mm	2500 mm	2500 mm

A different gauge and different ring diameters can be considered as well as double side machines with single or double drive. 3-draft machines (ST3) have gauge 300 mm only.

Gualchieri e Gualchieri reserve the right to modify the data in the tables without any notice in order to improve the machine performance.

## TECHNICAL PERFORMANCES

Max. draft (times)	999	999	999
Max. twists (tpm)	0-9999	0-9999	0-9999
Hollow spindles max. speed (rpm)	13000	13000	13000
Take-up ring spindles max. speed (rpm)	8800	8800	8800
Final yarn count (Nm)	0,5 - 40	0,5 - 40	0,5 - 40

Fanta **FILO**

Fanta **SPIN**

Our FANTAFILO has the ACIMIT Green Label Certification and it complies with INDUSTRY 4.0 ready.

## ENERGY G MONITORING

### Full control of production costs

Energy G MONITORING is a measuring system of the electricity. It allows to monitor in real time the actual machine energy cost for each yarn produced.

This system can be installed on any of our machine models upon request.

- ✓ Real time measuring of the energy used for each yarn
- ✓ Production history archive for data analysis
- ✓ It can be applied also on the existing machines

## YARN G QUALITY

### Maximizing the production, minimizing the operating costs

Yarn G QUALITY is an integrated software developed by us to program the detectors and manage the yarn breakages directly from the machine PC, without using external control units. The software helps to reduce the maintenance costs as well as the cost of the personnel in charge of the supervision on the machine.

- ✓ Saving of all the settings of the detectors in every yarn recipe
- ✓ Quality indicator of every yarn package according to the number of interventions registered
- ✓ It can be applied also on the existing machines

## YARN G LAB

### Your technician at your fingertips

Yarn G LAB is an app created for all the technicians that are involved in the manufacture of fancy yarns. The App, that is free of charge and can be downloaded from any platform, features tools open to everybody as well as a reserved area for our customers with several additional functions.

- ✓ Useful conversion tool of the yarn counts and definition of its characteristics
- ✓ It helps the technician to develop new yarns
- ✓ Remote control on our machines from any device and from any location in the world through personal user name and password

# Fonta **FILo**

THE SOFT YARN FOR KNITTING  
ONE MACHINE: TWO WORKING MODALITIES

## WORKING MODALITIES

Fonta **FILo** One hollow spindle and take-up on bobbin

Fonta **SPIN** Direct spinning bypassing the hollow spindle and take-up on bobbin

## DESCRIPTION

Our FANTAFILO frame produces particularly soft and bulky FANCY TWISTED YARNS from roving (roving frame or finisher) and from sliver in cans with one hollow spindle and take-up on bobbin. It is possible to feed the machine also from yarn (YARN TO YARN) with an external creel that can be supplied as an optional.

The drafting group may feature one, two or three drafts and can process both short staple cotton fibers and long staple woollen fibers. Upon request it is possible to supply different types of needle heads to install in place of the hollow spindles to produce SPECIAL YARNS like TUBE FILLED YARNS and AIRJET SOFTKNIT YARNS. The conversion is a simple and quick operation.

## PRODUCTION FACILITIES

- Management software with simple and intuitive interface
- Yarn programmes and working modalities software-selectable
- Industry 4.0 ready
- Remote assistance that can be enabled directly from the machine PC
- Energy Recovery System for the optimization of the electrical consumption
- Energy G MONITORING for the real time measurement of the electrical power consumption upon request

## TYPE OF YARNS

- Yarns for hand knitting
- Yarns for knitting

## OPTIONAL ACCESSORIES

- Needle heads
- Air-jet application
- Injection bars
- Final yarn detectors
- Stop-motions for the core yarn
- Creel from cans
- Creel from yarn

## FEEDING

**FL:** yarn to yarn (adding an external creel upon request)

**ST:** from roving or sliver  
(creel from cans optional upon request)

- ST1 (1 draft)
- ST2 (2 drafts) suitable also for short fibres (cotton type)
- ST3 (3 drafts)

## HOLLOW SPINDLE

- Flanged bobbin for binding yarn

## RING SPINDLE

- Take-up bobbin

MADE IN ITALY SINCE 1973
